

CERTIFICATE OF MOBILE HEALTH/MHEALTH BASICS PROFICIENCY (CMHBP)

COURSE DESCRIPTION

mHealth (mobile health) is a term referring to the use of mobile phones, apps, devices, and other wireless technology in medical care. Mobile health tools educate consumers regarding preventive healthcare services, provide disease monitoring, treatment support, epidemic outbreak tracing, chronic disease management, wellness tracking among other functions.

The **Certificate of Mobile Health/mHealth Basics Proficiency** course introduces the learner to current trends in mobile health, provides an understanding of interconnectivity, outlines advantages and disadvantages and provides a hands-on lesson which demonstrates the communication between a sample device and the electronic health record (EHR).

Learners may submit a survey to receive 2 contact hours of CE/CME credit toward continuing education requirements for medical licensure renewal in all 50 states.

LEARNING OBJECTIVES

- Define and describe the importance of mHealth (Mobile Health)
- Present an overview of mHealth advantages and disadvantages
- Demonstrate an understanding of connectivity between tracking devices and health record tools
- Discuss the future of mHealth tools and technologies

AVERAGE STUDY TIME: 2 hours

AUDIENCE: All Clinical Health Professionals, Technology Professionals, Healthcare Industry Consultants, and Medical Students at all levels.
